MEMORANDUM FOR: Assistant for Plans and Development

SUBJECT : Closed Circuit Television

1. This memorandum concerns CSD comments regarding the application of closed circuit television at the Center.

2. It appears that there are two separate requirements - one being a Center-wide system; the other being a portable tape recording package something similar to the [] package for use in briefings, presentations and special studies. Both requirements have a great degree of merit and should be considered together as a complete and intergrated system utilizing equipment that would be compatible throughout.

3. There has been criticism of the Director's briefing in that pertinent details on the photography are carefully pointed to the Director and are not seen by the viewing audience. Collateral materials shown to him are also not discernible to the audience. Photo details and collateral material could be picked up by the TV camera and shown on a monitor for both the Director and the audience to see. []

ILLEGIB

4. The Division would be interested in the Center-wide TV system in the future for information to various requesting stations throughout the building.

5. The Video-audio recording equipment appears to have many applicable uses for Center personnel. Some of the more promising seem to be:

- a. "Canned" presentations.
- b. Recordings of meetings and conferences.
- c. Quick supplement to present NPIC briefings showing information live or pre-canned to support briefing presentations.
- d. Training purposes.

Declass Review by NGA.

SUBJECT: Closed Circuit Television

6. Considering the rapid growth of the Center coupled with the growing need for some form of improvement to communications, it would appear that a system of this type would be quite beneficial to all concerned at NPIC.
